*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to a support grid subcombination, classified in class 52, subclass 664.
  - II. Claims 12, 15-17, 23, and 24, drawn to a combination, classified in class 261, subclass 111.
  - III. Claims 25-29, drawn to a splash bar subcombination, classified in class 428, subclass 33.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a support means for solid, non-apertured baffle plates. See MPEP § 806.05(d).
3. Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combinations as recited by each of claims 12, 15-17, 23, and 24 do not require the particulars of any of the independent subcombination claims 25, 26, and 29. The subcombination has separate utility such as mixing elements for use within a static mixer.

Art Unit: 1724

4. Applicant should note that an election to prosecute subcombination claims 1-11 of Group I would also provide for examination of each of combination claims 12-24, since these combination claims each include the particulars of the subcombination claims 1-11.

5. Election to prosecute subcombination claims 25-29 of Group III would also provide for examination of combination claims 13, 14, and 18-22 therewith, since these combination claims each include the particulars of the subcombination claims 25-29. If applicant chooses Group III, it would further prosecution greatly if applicant would also rewrite claims 13, 19, and 20 in independent form at the time of the election.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Bushey whose telephone number is (703) 308-3581. The examiner can normally be reached on Monday-Thursday 6:30AM-5:00PM.

Art Unit: 1724
